

MORAIN VALLEY COMMUNITY COLLEGE

Office of the President

January 6, 2011

Dear STARS Team:

Re: STARS Data Report Submission

Moraine Valley Community College is committed to furthering a sustainable environment, a healthy society, and a strong economy. As part of this commitment, MVCC has made sustainability an integral part of college practices.

The MVCC Board of Trustees will be considering a Sustainability Commitment resolution at its January meeting, and the college is a signatory of the Illinois Sustainable Campus Compact. We also erected our first LEED certified building in 2010, with a commitment to green building practices for all other new construction or major build-outs.

The data submitted in this report captures our progress in this endeavor. Sustainability requires leadership and continuing dialogue. We appreciate collaboration with STARS as an important part of our sustainability process.

Sincerely,

Vernon O. Crawley, D. Ed.
President
